

Project Overview

H2Accelerate TRUCKS aims to promote and accelerate the uptake of hydrogen trucks in Europe. Funded by the Clean Hydrogen Partnership, the project will deploy 150 fuel cell trucks across 9 European countries by 2029.

Project Objectives

- Achieve the first **large-scale fuel cell truck deployment** in Europe with 150 fuel cell trucks
- Operate on a **network of high throughput hydrogen refuelling stations** accessible for trucks and thereby increase the demand for hydrogen
- **Raise awareness** on the benefits of green hydrogen trucking and improve people's confidence in the technology
- Develop a reliable database and conduct deep analysis of technical, environmental and attitudinal data to **display the viability of hydrogen** as a solution to decarbonize road freight

Paving the way for large scale deployment of hydrogen trucks and the hydrogen refuelling network throughout Europe

This project has received funding from the Clean Hydrogen Partnership under Grant Agreement 101101446. This partnership receives support from the European Union's Horizon Europe research and innovation Programme. The project is co-funded by the Research Council of Norway and the Swiss State Secretariat for Education, Research and Innovation (SERI). The content of this presentation reflects only the author's view.

Accelerating the uptake of low carbon hydrogen for trucking

What's next..

Throughout the project the Consortium will participate and organise the following events:

MAY 2024

Transpotec Logitec Fair
Milan

European events participation

HyVolution

Paris, France

Hannover Messe - World Industry Forum

Hannover, Germany

European Hydrogen Week

Belgium, Brussels

Multiple Partners

And more...
